Kubera Cross-Border Fund Limited

Net Asset Value

Kubera Cross-Border Fund Limited (the “Fund”) (LSE/AIM: KUBC) announces that as at close of business on 30 September 2011, its un-audited net asset value per share (“NAV”) was US\$ 0.94, an 8% decline from the NAV of US\$ 1.02 as of 30 June 2011.

The decrease in NAV is primarily attributable to the depreciation of Indian Rupee vis-à-vis the US Dollar, which is the denomination of the Fund, and a decrease in relative public equity market valuations. Shareholder distributions to date taken together with the NAV total US\$ 1.22.

More details are available in the quarterly newsletter for the three month period ended 30 September 2011, also being released today.

Valuation Methodology

The Fund’s investments in securities are measured and reported at estimated fair value under US GAAP, in accordance with the Statement of Financial Accounting Standards No.157, Fair Value Measurement.

If a security is listed on several stock exchanges or markets, the last closing price on the stock exchange or market which constitutes the main market for such security is used.

In the event that a listed security has no such price or the market price is not representative of the fair market value, the security has limited marketability, or the security is unlisted, its fair value is determined by the Investment Manager, taking into account forward market comparable multiples, trailing market comparable multiples, transaction multiples, and discounted cash flow models. Inputs include trading values on public exchanges for comparable securities, historic, current and projected operating performance, and financing transactions subsequent to the acquisition of the investment. A discount of up to 10% is taken for holdings in securities where there is a risk associated with a lack of liquidity or marketability. A revaluation of these securities is accepted by the Fund only upon majority approval of the independent directors of the Fund.
